#### NOTE 1 - DESCRIPTION OF BUSINESS AND BASIS OF PRESENTATION

#### **Description of Business**

Effective July 1, 2015, the Company restructured the corporate organization of the management of diagnostic imaging centers segment of our business. The reorganization was structured to more completely integrate the operations of Health Management Corporation of America and HDM. Imperial contributed all of its assets (which were utilized in the business of Health Management Corporation of America) to HDM and received a 24.2% interest in HDM. Health Management Corporation of America retained a direct ownership interest of 45.8% in HDM, and the original investors in HDM retained a 30.0% ownership interest in the newly expanded HDM. The entire management of diagnostic imaging centers business segment is now being conducted by HDM, operating under the name "Health Management Company of America".

#### Basis of Presentation

The accompanying unaudited condensed consolidated financial statements have been prepared in accordance with generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. Accordingly, they do not include all of the information and footnotes required by accounting principles generally accepted in the United States of America for complete financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three months and nine months ended March 31, 2020, are not necessarily indicative of the results that may be expected for the fiscal year ending June 30, 2020. For further information, refer to the consolidated financial statements and footnotes thereto included in the Company's Annual Report on Form 10-K filed on September 30, 2019 for the fiscal year ended June 30, 2019.

During March 2020, the global pandemic of COVID-19 has caused turbulence and uncertainty in the United States and international markets and economies may adversely effect our workforce, liquidity, financial condition, revenues, profitability and business operations, generally. COVID-19 has caused us to require that much of our workforce work from home and has restricted the ability of our personnel to travel for marketing purposes or to service our customers. Through March 31, 2020, COVID-19 did not have a material effect on the financial condition and results of operations of the Company.

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

#### Principles of Consolidation

The unaudited condensed consolidated financial statements include the accounts of FONAR Corporation, its majority and wholly-owned subsidiaries and partnerships (collectively the "Company"). All significant intercompany accounts and transactions have been eliminated in consolidation.

(Amounts and shares in thousands, except per share amounts) (UNAUDITED)

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### Revenues

On July 1, 2018, the Company adopted the new revenue recognition accounting standard issued by the Financial Accounting Standards Board ("FASB") and codified in the ASC as topic 606 ("ASC 606"). The revenue recognition standard in ASC 606 outlines a single comprehensive model for recognizing revenue as performance obligations, defined in a contract with a customer as goods or services transferred to the customer in exchange for consideration, are satisfied. The standard also requires expanded disclosures regarding the Company's revenue recognition policies and significant judgments employed in the determination of revenue.

Our revenues generally relate to net patient fees received from various payers and patients themselves under contracts in which our performance obligations are to provide diagnostic services to the patients. Revenues are recorded during the period our obligations to provide diagnostic services are satisfied. Our performance obligations for diagnostic services are generally satisfied over a period of less than one day. The contractual relationships with patients, in most cases, also involve a third-party payer (Medicare, Medicaid, managed care health plans and commercial insurance companies, including plans offered through the health insurance exchanges) and the transaction prices for the services provided are dependent upon the terms provided by (Medicare and Medicaid) or negotiated with (managed care health plans and commercial insurance companies) the third-party payers. The payment arrangements with third-party payers for the services we provide to the related patients typically specify payments at amounts less than our standard charges and generally provide for payments based upon predetermined rates per diagnostic services or discounted fee-for-service rates. Management continually reviews the contractual estimation process to consider and incorporate updates to laws and regulations and the frequent changes in managed care contractual terms resulting from contract renegotiations and renewals.

#### Earnings Per Share

Basic earnings per share ("EPS") is computed based upon the weighted average number of shares of common stock and stock equivalents outstanding, net of common stock. In accordance with ASC topic 260-10, "Participating Securities and the Two-Class method", the Company used the Two-Class method for calculating basic income per share and applied the if converted method in calculating diluted income per share for the three and nine months ended March 31, 2020 and 2019.

Diluted EPS reflects the potential dilution from the exercise or conversion of all dilutive securities into common stock based on the average market price of common shares outstanding during the period. For the three and nine months ended March 31, 2020 and 2019, diluted EPS for common shareholders includes 128 shares upon conversion of Class C Common.

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### Recent Accounting Pronouncements

In December 2019, the FASB issued ASU No. 2019-12, Income Taxes (Topic 740): Simplifying the Accounting for Income Taxes, which is intended to simplify various aspects related to accounting for income taxes. ASU 2019-12 removes certain exceptions to the general principles in Topic 740 and also clarifies and amends existing guidance to improve consistent application. ASU 2019-12 is effective for the Company beginning July 1, 2021. The Company is currently evaluating the impact of the adoption of ASU 2019-12 on its condensed consolidated financial statements.

In January 2017, the FASB issued Accounting Standards Update ("ASU") 2017-04, Intangibles – Goodwill and Other (Topic 350). The amendments in this update simplify the test for goodwill impairment by eliminating Step 2 from the impairment test, which required the entity to perform procedures to determine the fair value at the impairment testing date of its assets and liabilities following the procedure that would be required in determining fair value of assets acquired and liabilities assumed in a business combination. The amendments in this update are effective for public companies for annual or any interim goodwill impairment tests in fiscal years beginning after December 15, 2019. We are evaluating the impact of adopting this guidance on our condensed consolidated condensed financial statements.

During February 2016, FAS issued ASU 2016-02, Leases (Topic 842). The new standard requires lessees to apply a dual approach, classifying leases as either finance or operating leases based upon the principle of whether or not the lease is effectively a financed purchase by the lessee. This classification will determine whether lease expense is recognized based on an effective interest method or on a straight-line basis over the term of the lease. A lessee is also required to record a right-of-use asset and a lease liability for all leases with a term of greater than 12 months regardless of their classification. Lease with a term of 12 months or less will be accounted for similar to existing guidance for operating leases. The new guidance will be effective for annual reporting periods beginning after December 15, 2018, including interim periods within that reporting period and is applied retrospectively. The Company adopted this guidance on July 1, 2019, as required, electing to apply retrospectively at the period of adoption with practical expedients. The adoption of this guidance had a material impact on the Company's balance sheet by virtue of including the present value of its future operating lease payments as a liability of \$33.3 million and related right-to-use lease assets as of July 1, 2019.

(Amounts and shares in thousands, except per share amounts) (UNAUDITED)

#### NOTE 2 - SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

#### Recent Accounting Pronouncements (Continued)

The Company accounts for its various operating leases in accordance with Accounting Standards Codification ('ASC') 842 – Lease, as updated by ASU 2016-02. At the inception of a lease, the Company recognizes right-of-use lease assets and related lease liabilities measured at present value of future lease payments on its balance sheet. Lease expense is recognized on a straight-line basis over the term of the lease. The Company reviewed its contracts with vendors and customers, determining that its right-to-use lease assets consisted of only office space operating leases. In determining the right-to-use lease assets and liabilities, the Company did recognize lease extension options which the Company feels would be reasonably exercised. Also included in other current assets is a \$562 receivable from a landlord for tenant improvements. A reconciliation of operating lease payments undiscounted cash flows to lease liabilities recognized as of March 31, 2020 is as follows:

	Operating Lease Payments
2020 (Three Months)	1,214
2021	4,782
2022	4,463
2023	4,415
2024	4,120
Thereafter	21,545
Present Value discount (5.5% weighted average)	(9,440)
Total lease liability	31,099

FASB, the Emerging Issues Task Force and the SEC have issued certain other accounting standards, updates, and regulations as of March 31, 2020 that will become effective in subsequent periods; however, management does not believe that any of those updates would have significantly affected our financial accounting measures or disclosures had they been in effect during 2020 or 2019, and it does not believe that any of those pronouncements will have a significant impact on our consolidated condensed financial statements at the time they become effective.

#### Reclassifications

Certain prior year amounts have been reclassified to conform to the current year presentation. The reclassifications did not have any effect on reported consolidated net income for any periods presented.

(Amounts and shares in thousands, except per share amounts) (UNAUDITED)

### NOTE 3 – ACCOUNTS RECEIVABLE, MEDICAL RECEIVABLE AND MANAGEMENT AND OTHER FEES RECEIVABLE

Receivables, net is comprised of the following at March 31, 2020, and June 30, 2019:

		March 31, 2020	
		Allowance for	
	Gross	doubtful	
	Receivable	<u>accounts</u>	Net
Accounts receivable	<u>\$ 4,402</u>	<u>\$ 570</u>	\$ 3,832
Accounts receivable - related party	\$ 30		\$ 30
Medical receivable	\$ 16,481	<u>\$</u>	\$ 16,481
Management and other fees receivable	\$ 37,483	\$ 9,476	\$ 28,007
Management and other fees receivable from related medical practices ("PC's")	\$ 9,827	\$ 2,792	\$ 7,035

	June 30, 2019				
		Allowance for			
	Gross	doubtful			
	Receivable	accounts	Net		
Accounts receivable	\$ 3,927	\$ 190	\$ 3,737		
Accounts receivable - related party	<u>\$</u>		<u> </u>		
Medical receivable	\$ 15,729	<u>\$</u>	\$ 15,729		
Management and other fees receivable	<u>\$ 35,114</u>	<u>\$ 9,405</u>	\$ 25,709		
Management and other fees receivable from related medical practices ("PC's")	\$ 8,812	\$ 2,311	\$ 6,501		

The Company's customers are concentrated in the healthcare industry.

#### Accounts Receivable

Credit risk with respect to the Company's accounts receivable related to product sales and service and repair fees is limited due to the customer advances received prior to the commencement of work performed and the billing of amounts to customers as sub-assemblies are completed. Service and repair fees are billed on a monthly or quarterly basis and the Company does not continue providing these services if accounts receivable become past due. The Company controls credit risk with respect to accounts receivable from service and repair fees through its credit evaluation process, credit limits, monitoring procedures and reasonably short collection terms. The Company performs ongoing credit authorizations before a product sales contract is entered into or service and repair fees are provided.

(Amounts and shares in thousands, except per share amounts) (UNAUDITED)

### NOTE 3 – ACCOUNTS RECEIVABLE, MEDICAL RECEIVABLE AND MANAGEMENT AND OTHER FEES RECEIVABLE (CONTINUED)

#### Long Term Accounts Receivable

The Company generated revenue from long-term, non-cancellable contracts to provide service and repair services. Future revenue to be received over the next four years at March 31, 2020 are as follows:

2021	\$ 579	
2022	579	
2023	579	
2024	 <u>359</u>	
Total	\$ 2,096	

#### Medical Receivables

Medical receivables are due under fee-for-service contracts from third party payors, such as hospitals, government sponsored healthcare programs, patient's legal counsel and directly from patients. Substantially all the revenue relates to patients residing in Florida. The carrying amount of the medical receivable is reduced by an allowance that reflects management's best estimate of the amounts that will not be collected. The Company continuously monitors collections from its clients and maintains an allowance for bad debts based upon the Company's historical collection experience. The Company determines allowances for contractual adjustments and uncollectible accounts based on specific agings, specific payor collection issues that have been identified and based on payor classifications and historical experience at each site.

#### Management and Other Fees Receivable

The Company's receivables from the related and non-related professional corporations (PC's) substantially consist of fees outstanding under management agreements. Payment of the outstanding fees is dependent on collection by the PC's of fees from third party medical reimbursement organizations, principally insurance companies and health management organizations.

Payment of the management fee receivables from the PC's may be impaired by the inability of the PC's to collect in a timely manner their medical fees from the third party payors, particularly insurance carriers covering automobile no-fault and workers compensation claims due to longer payment cycles and rigorous informational requirements and certain other disallowed claims. Approximately 72% and 67% of the PCs' net revenues for the three months ended March 31, 2020 and 2019, respectively, were derived from no-fault and personal injury protection claims. Approximately 66% and 67% of the PCs' net revenues for the nine months ended March 31, 2020 and 2019, respectively, were derived from no-fault and personal injury protection claims. The Company considers the aging of its accounts receivable in determining the amount of allowance for doubtful accounts. The Company generally takes all legally available steps to collect its receivables. Credit losses associated with the receivables are provided for in the condensed consolidated financial statements and have historically been within management's expectations.

(Amounts and shares in thousands, except per share amounts) (UNAUDITED)

### NOTE 3 – ACCOUNTS RECEIVABLE, MEDICAL RECEIVABLE AND MANAGEMENT AND OTHER FEES RECEIVABLE (CONTINUED)

Management and Other Fees Receivable (Continued)

Net revenues from management and other fees charged to the related PCs accounted for approximately 12.4% and 10.5% of the consolidated net revenues for the three months ended March 31, 2020 and 2019, respectively. Net revenues from management and other fees charged to the related PCs accounted for approximately 11.5% and 10.8% of the consolidated net revenues for the nine months ended March 31, 2020 and 2019, respectively.

Tallahassee Magnetic Resonance Imaging, PA, Stand Up MRI of Boca Raton, PA and Stand Up MRI & Diagnostic Center, PA (all related medical practices) entered into a guaranty agreement, pursuant to which they cross guaranteed all management fees which are payable to the Company, which have arisen under each individual management agreement. Additional Company managed entities also operate under a guaranty agreement, pursuant to which management fees are payable to the Company.

The Company's patient fee revenue, net of contractual allowances and discounts for the three and nine months ended March 31, 2020 and 2019 are summarized in the following table.

	For the Three Months Ended March 31,			
		2020		2019
Commercial Insurance/ Managed Care	\$	1,166	\$	1,345
Medicare/Medicaid		280		315
Workers' Compensation/Personal Injury		4,120		4,569
Other		147		181
Patient Fee Revenue, net of contractual allowances and				
discounts	\$	<u>5,713</u>	\$	6,410

	For the Nine Months Ended  March 31,			
		2020		2019
Commercial Insurance/ Managed Care	\$	3,856	\$	3,860
Medicare/Medicaid		821		876
Workers' Compensation/Personal Injury		12,526		12,227
Other		<u>551</u>		893
Patient Fee Revenue, net of contractual allowances and				
discounts	\$	17,754	\$	17,856

(Amounts and shares in thousands, except per share amounts) (UNAUDITED)

#### **NOTE 4 - INVENTORIES**

Inventories included in the accompanying condensed consolidated balance sheets consist of the following:

	rch 31, 2020	une 30, 2019
Purchased parts, components and supplies	\$ 1,619	\$ 1,640
Work-in-process	 <u> 156</u>	 158
TOTAL INVENTORIES	\$ 1,775	\$ 1,798

#### NOTE 5 - COSTS AND ESTIMATED EARNINGS ON UNCOMPLETED CONTRACTS

Information relating to uncompleted contracts is as follows:

	March 31, 2020		•		
Costs incurred on uncompleted contracts	\$	448	\$	448	
Estimated earnings		<u>310</u>		1,089	
Subtotal		758		1,537	
Less: Billings to date		<u>605</u>		1,012	
Total Costs and estimated earnings in excess of billings on	_		_		
uncompleted contracts - net	<u>\$</u>	<u>153</u>	<u>\$</u>	<u>525</u>	

#### NOTE 6 - OTHER INTANGIBLE ASSETS

Other intangible assets, net of accumulated amortization, in the accompanying condensed consolidated balance sheets consist of the following:

J	March 31, 2020		June 30, 2019		
Capitalized software development costs	\$	7,005	\$	7,005	
Patents and copyrights		5,043		4,964	
Non-compete		4,100		4,100	
Customer relationships		3,800		3,800	
Gross Other intangible assets		19,948		19,869	
Less: Accumulated amortization		15,78 <u>6</u>		15,11 <u>3</u>	
Other Intangible Assets	\$	4,162	\$	4,756	

(Amounts and shares in thousands, except per share amounts) (UNAUDITED)

#### NOTE 6 - OTHER INTANGIBLE ASSETS (CONTINUED)

Amortization of patents and copyrights for the three months ended March 31, 2020 and 2019 amounted to \$45 and \$50, respectively.

Amortization of non-compete for the three months ended March 31, 2020 and 2019 amounted to \$98 and \$146, respectively.

Amortization of customer relationships for the three months ended March 31, 2020 and 2019 amounted to \$48 and \$48, respectively.

Amortization of patents and copyrights for the nine months ended March 31, 2020 and 2019 amounted to \$139 and \$149, respectively.

Amortization of non-compete for the nine months ended March 31, 2020 and 2019 amounted to \$391 and \$439, respectively.

Amortization of customer relationships for the nine months ended March 31, 2020 and 2019 amounted to \$143 and \$143, respectively.

#### NOTE 7 - OTHER CURRENT LIABILITIES

Other current liabilities in the accompanying condensed consolidated balance sheets consist of the following:

	M	arch 31, 2020	J 	lune 30, 2019
Accrued salaries, commissions and payroll taxes	\$	1,442	\$	3,898
Litigation accruals		141		145
Sales tax payable		1,519		1,671
Legal and other professional fees		109		126
Accounting fees		90		105
Self-funded health insurance reserve		115		68
Accrued interest and penalty		976		1,054
Other		770		510
Other Current Liabilities	\$	5,162	\$	7,577

#### NOTE 8 - STOCKHOLDERS EQUITY

#### Common Stock

During the nine months ended March 31, 2020, the Company issued 90 shares of common stock for costs and expenses of \$1,990.

(Amounts and shares in thousands, except per share amounts) (UNAUDITED)

#### NOTE 9 - SEGMENT AND RELATED INFORMATION

The Company operates in two industry segments - manufacturing and the servicing of medical equipment and management of diagnostic imaging centers.

The accounting policies of the segments are the same as those described in the summary of significant accounting policies as disclosed in the Company's 10-K as of June 30, 2019. All inter-segment sales are market-based. The Company evaluates performance based on income or loss from operations. Summarized financial information concerning the Company's reportable segments is shown in the following table:

#### NOTE 10 - SUPPLEMENTAL CASH FLOW INFORMATION

During the nine months ended March 31, 2020 and March 31, 2019, the Company paid \$21 and \$158 for interest, respectively.

During the nine months ended March 31, 2020 and March 31, 2019, the Company paid \$228 and \$305 for income taxes, respectively.

During the nine months ended March 31, 2020, the Company recorded a current receivable of \$950 from a landlord for tenant improvements.

#### NOTE 11 - COMMITMENTS AND CONTINGENCIES

#### Litigation

The Company is subject to legal proceedings and claims arising from the ordinary course of its business, including personal injury, customer contract and employment claims. In the opinion of management, the aggregate liability, if any, with respect to such actions, will not have a material adverse effect on the consolidated financial position or results of operations of the Company.

There were no material changes in litigation from that reported in our Form 10-K for the fiscal year ended June 30, 2019.

#### Other Matters

The Company is also delinquent in filing sales tax returns for certain states, for which the Company has transacted business. As of March 31, 2020, the Company has recorded tax obligations of approximately \$1,519 plus interest and penalties of approximately \$930. The Company is in the process of determining the regulatory requirements in order to become compliant.

The Company maintains a self-funded health insurance program with a stop-loss umbrella policy with a third party insurer to limit the maximum potential liability for individual claims to \$100 per person and for a maximum potential claim liability based on member enrollment. With respect to this program, the Company considers historical and projected medical utilization data when estimating its health insurance program liability and related expense. As of March 31, 2020 and June 30, 2019, the Company had approximately \$115 and \$68, respectively, in reserve for its self-funded health insurance programs. The reserves are included in "Other current liabilities" in the condensed consolidated balance sheets.

The Company regularly analyzes its reserves for incurred but not reported claims, and for reported but not paid claims related to its reinsurance and self-funded insurance programs. The Company believes its reserves are adequate. However, significant judgment is involved in assessing these reserves such as assessing historical paid claims, average lags between the claims' incurred date, reported dates and paid dates, and the frequency and severity of claims. There may be differences between actual settlement amounts and recorded reserves and any resulting adjustments are included in expense once a probable amount is known. There were no significant adjustments recorded in the periods covered by this report.

(Amounts and shares in thousands, except per share amounts) (UNAUDITED)

#### **NOTE 12 - INCOME TAXES**

In accordance with ASC 740-270, Income Taxes – Interim Reporting, the Company is required at the end of each interim period to determine the best estimate of its annual effective tax rate and apply that rate to year-to-date ordinary income or loss. The resulting tax expense (or benefit) is adjusted for the tax effect of specific events, if any, required to be discretely recognized in the interim period as they occur. For the nine months ended March 31, 2020 and 2019, the Company recorded income tax expense of \$2,849 in 2020 as compared to \$3,701 in 2019. The 2020 provision is comprised of a current income tax component of \$368 and a deferred income tax component of \$2,481. Obligations for any liability associated with the current income tax provision, has been reduced, primarily resulting from the benefits and utilization of net operating loss carryforwards.

ASC topic 740 prescribes a recognition threshold and a measurement attribute for the financial statement recognition and measurement of tax positions taken or expected to be taken in a corporate tax return. For those benefits to be recognized, a tax position must be more-likely-than-not to be sustained upon examination by taxing authorities. Differences between tax positions taken or expected to be taken in a tax return and the benefit recognized and measured pursuant to the interpretation are referred to as unrecognized benefits. A liability is recognized (or amount of net operating loss carryforward or amount of tax refundable is reduced) for an unrecognized tax benefit because it represents an enterprise's potential future obligation to the taxing authority for a tax position that was not recognized as a result of applying the provisions of ASC topic 740. The Company believes there are no uncertain tax positions in prior years tax filings and therefore it has not recorded a liability for unrecognized tax benefits.

In accordance with ASC topic 740, interest costs related to unrecognized tax benefits are required to be calculated (if applicable) and would be classified as "Interest expense, net". Penalties if incurred would be recognized as a component of "Selling, general and administrative" expenses.

The Company files corporate income tax returns in the United States (federal) and in various state and local jurisdictions. In most instances, the Company is no longer subject to federal, state and local income tax examinations by tax authorities for years prior to 2015.

The Company recorded a deferred tax asset of \$18,457 and a deferred tax liability of \$243 as of March 31, 2020, primarily relating to net operating loss carryforwards of approximately \$53,460 available to offset future taxable income through 2030. The net operating losses begin to expire in 2023 for federal tax and state income tax purposes.

Future ownership changes as determined under Section 382 of the Internal Revenue code could further limit the utilization of net operating loss carryforwards. As of March 31, 2020, no such changes in ownership have occurred.

(Amounts and shares in thousands, except per share amounts) (UNAUDITED)

#### NOTE 12 - INCOME TAXES (CONTINUED)

The ultimate realization of deferred tax assets is dependent on the generation of future taxable income during the periods in which those temporary differences become deductible or when such net operating losses can be utilized. The Company considers projected future taxable income, the regulatory environment of the industry and tax planning strategies in making this assessment. At present, the Company believes that it is more likely than not that the benefits from certain deferred tax asset carryforwards, will not all be fully realized. In recognition of this inherent risk, a valuation allowance was established for the partial value of the deferred tax asset, (principally related to research and development tax credits).

A valuation allowance will be maintained until sufficient positive evidence exists to support the reversal of the remainder of the valuation.

On March 27, 2020 Congress enacted the CARES Act (Coronavirus Aid, Relief and Economic Security Act). The Act provides numerous tax provisions and other stimulus measures, including temporary changes regarding prior and future operation losses, temporary changes to the prior and future limitations on interest deductions, temporary suspension of certain payment requirements for the employer portion of Social Security taxes, technical corrections to prior tax legislation for tax depreciation of certain qualified improvement property and the creation of refundable employee retention credits.

At the present time, the only impact of the CARES Act to the Company is allowing a full reimbursement of \$1,200 of tax credits relating to the alternative minimum tax credits in the current year. Previously, these credits were to be refunded over a 3 year period.

As we continue to monitor tax implications of the CARES Act and other state and federal stimulus tax legislation, we may make adjustments to our estimates and record additional amounts for tax assets and liabilities

#### NOTE 13 – SUBSEQUENT EVENTS

The Company has evaluated events that occurred subsequent to March 31, 2020 and through the date the condensed consolidated financial statements were issued.

The COVID-19 outbreak has caused the Company's owned and managed sites to continue to decline after March 31, 2020 as a result of the intensification of the virus and the attendant quarantines and lockdowns. By the end of April 2020, the number of scans being preformed are only at approximately 50% of pre-COVID-19 levels. As the authorities begin to reassess the situation in May and June 2020, some quarantine and lockdown measures may be able to be lifted and following that it is uncertain whether or not our scanning levels can be expected to begin to return to pre-COVID-19 levels. We are unable to predict, how long the present COVID-19 pandemic will continue or when it will abate, or whether it will worsen.

Item 2. – MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS.

For the nine-month period ended March 31, 2020, we reported a net income of \$10.6 million on revenues of \$64.9 million as compared to net income of \$14.6 million on revenues of \$64.7 million for the nine-month period ended March 31, 2019. Operating income decreased from \$18.1 million for the nine-month period ended March 31, 2019 to \$13.1 million for the nine-month period ended March 31, 2020.

For the three-month period ended March 31, 2020, we reported a net income of \$1.9 million on revenues of \$21.7 million as compared to net income of \$5.2 million on revenues of \$22.8 million for the three-month period ended March 31, 2019.

The revenue increased slightly, from \$64.7 million for the first nine months of fiscal 2019 to \$64.9 million for the first nine months of fiscal 2020, was primarily due to increases in net management fees of \$1.3 million, from \$39.4 million for the first nine months of fiscal 2019 to \$40.7 million for the first nine months of fiscal 2020. Revenues from product sales and service and repair fees decreased by \$1.0 million from \$7.4 million for the first nine months of fiscal 2019 to \$6.4 million for the first nine months of fiscal 2020.

While our revenues increased, our costs and expenses increased by a larger amount, resulting in our operating income decreasing to \$13.1 million for the nine months ended March 31, 2020 as compared to \$18.1 million for the nine months ended March 31, 2019. In terms of percentages, costs and expenses increased 11.1% from \$46.6 million for the first nine months of fiscal 2019 to \$51.8 million for the first nine months of fiscal 2020, while revenues increased slightly, from \$64.7 million for the first nine months of fiscal 2019 to \$64.9 million for the first nine months of fiscal 2020.

Fonar's wholly owned subsidiary, Health Management Corporation of America ("HMCA"), is the controlling interest, of Health Diagnostics Management, LLC ("HDM"). HMCA presently has a direct ownership interest of 70.0% in HDM, and the investors in HDM have a 30.0% ownership interest. The entire management of the diagnostic imaging centers business segment is being conducted by HDM, operating under the name "Health Management Company of America". For the sake of simplicity, HMCA, and HDM are referred to as "HMCA", unless otherwise indicated.

Through March 31, 2020, the COVID-19 virus had not had a material effect on the financial condition and results of operations of the Company. Revenues have increased slightly for the nine-month period and declined only slightly for the three-month period. The drop in operating income of approximately \$5.0 million for the nine-month period ended March 31, 2020 (as compared to the first nine months of fiscal 2019) was due entirely to a \$5.2 million increase in costs and expenses for the period. Revenues for the same nine-month period increased by \$175,000. The greater part of the increase in costs and expenses, \$2.9 million, occurred in the third quarter of fiscal 2020 (\$19.1 million in the third quarter of fiscal 2020 as compared to \$16.2 in the third quarter of fiscal 2019), which included an increase of \$2.6 million in selling, general and administrative expenses (\$7.2 million in the third quarter of fiscal 2020 as compared to \$4.6 in the third quarter of fiscal 2019). The increase in service, general and administrative expense was due mainly to additional reserves taken on Management Fees, service contract receivables, and on Notes receivable. Some of these reserves have been taken in the ordinary course of business and some in connection with the impact of the COVID-19 virus.

The volume of scans performed at HMCA owned and HMCA managed sites continued to decline after March 31, 2020 as a result of the intensification of the COVID-19 virus and the attendant quarantines and lockdowns. By the middle of April, the number of scans being performed were at approximately 50% of pre-COVID-19 levels. The Company also has been willing to accommodate some of its MRI scanner service customers who can demonstrate need, allowing a deferral of a part of the payments due Fonar under their service contracts. Some of these deferred amounts, however, may prove to be uncollectable, and some amounts already outstanding may prove uncollectable as well. At the present volumes of scans, the Company does not believe the scanning centers will be able to pay the current levels of its Management Fees or satisfy previously incurred Management Fee obligations

As the authorities begin to reassess the situation in May and June, 2020, some quarantine and lockdown measures may be able to lifted and following that, we expect our scanning levels will begin to return to pre-COVID-19 levels. We are unable to predict, however, how long the present COVID-19 pandemic will continue or when it will abate, or whether it will worsen. For these reasons the Company has strengthened its cost controls, but also is looking to the future and continuing its program of expanding its scanning capacity. We anticipate we will complete the installation of three additional scanners in the first guarter of fiscal 2021.

#### Forward Looking Statements

Certain statements made in this Quarterly Report on Form 10-Q are "forward-looking statements" (within the meaning of the Private Securities Litigation Reform Act of 1995) regarding the plans and objectives of Management for future operations. Such statements involve known and unknown risks, uncertainties and other factors that may cause our actual results, performance or achievements to be materially different from any future results, performance or achievements expressed or implied by such forward-looking statements. The forward-looking statements included herein are based on current expectations that involve numerous risks and uncertainties. Our plans and objectives are based, in part, on assumptions involving the expansion of business. Assumptions relating to the foregoing involve judgments with respect to, among other things, future economic, competitive and market conditions and future business decisions, all of which are difficult or impossible to predict accurately and many of which are beyond our control. Although we believe that our assumptions underlying the forward-looking statements are reasonable, any of the assumptions could prove inaccurate and, therefore, there can be no assurance that the forward-looking statements included in this Report will prove to be accurate. In light of the significant uncertainties inherent in the forward-looking statement included herein, the inclusion of such information should not be regarded as a representation by us or any other person that our objectives and plans will be achieved.

During March 2020, the global pandemic of COVID-19 has caused turbulence and uncertainty in the United States and international markets and economies may adversely effect our workforce, liquidity, financial condition, revenues, profitability and business operations, generally. COVID-19 has caused us to require that much of our workforce work from home and has restricted the ability of our personnel to travel for marketing purposes or to service our customers. Through March 31, 2020, COVID-19 did not have a material effect on the financial condition and results of operations of the Company. Subsequent to March 31, 2020 COVID-19 has caused a decrease in the number of scans performed at our owned and managed centers and will likely have an impact on its financial results that the Company is not currently able to quantify.

#### **Results of Operations**

We operate in two industry segments: the manufacture and servicing of medical (MRI) equipment, which is conducted by Fonar, and diagnostic facilities management services, which is conducted through HMCA.

#### Manufacturing and Service of MRI Equipment

Revenues from MRI product sales decreased to \$288,000 for the first nine months of fiscal 2020 from \$1.2 million for the first nine months of fiscal 2019. Costs related to product sales increased, from \$539,000 for the nine- month period ended March 31, 2019 to \$685,000 for the nine-month period ended March 31, 2020. Economic uncertainty and lower reimbursement rates for MRI scans, have depressed the market for our MRI scanner products, notwithstanding our scanners' unique technological capabilities (e.g. multi positional scanning). Due to the low sales volumes of out MRI product, period to period comparisons are not necessarily indicative of any trends.

Service revenues decreased slightly by 1.2% from \$6.2 million for the nine- month period ended March 31, 2019 to \$6.1 million for the nine- month period ended March 31, 2020. Continuing lower sales volumes have been a factor ultimately contributing to the decrease in service revenues, as the revenue from new scanners being placed under service agreements, following the expiration of their warranties, is insufficient to replace the revenue lost as a result of older scanners being taken out of service.

Costs relating to providing service was \$2.2 million in the first nine months of fiscal 2019 and \$2.3 million in the first nine months of fiscal 2020. Because of our ability to monitor the performance of customers' scanners from our facilities in Melville, New York on a daily basis and to detect and repair any irregularities before more serious and costly problems developed, we have been able to control our costs of providing service.

There were approximately \$417,000 in foreign revenues for the first nine months of fiscal 2020 as compared to approximately \$393,000 in foreign revenues for the first nine months of fiscal 2019, representing an increase in foreign revenues of 6.1%. We do not regard this as a material trend, but as part of a normal although sometimes volatile variation resulting from low volumes of foreign sales.

We recognize MRI scanner sales revenues on the "percentage of completion" basis, which means the revenues are recognized as the scanner is manufactured. Revenues recognized in a particular quarter do not necessarily reflect new orders or progress payments made by customers in that quarter. We build the scanner as the customer meets certain benchmarks in its site preparation in order to minimize the time lag between incurring costs of manufacturing and our receipt of the cash progress payments from the customer which are due upon delivery. Consequently, there can be a disparity between the revenues recognized in a fiscal period and the number of product sales. Generally, the revenues from a scanner sale are recognized in a fiscal quarter or quarters following the quarter in which the sale was made.

Revenues for the medical equipment segment decreased to \$6.4 million for the first nine months of fiscal 2020 from \$7.4 million for the first nine months of fiscal 2019. Operating losses for our medical equipment segment increased to an operating loss of \$3.3 million, for the first nine months of fiscal 2020 as compared to an operating loss of \$665,000 for the first nine months of fiscal 2019.

#### Diagnostic Facilities Management Services

HMCA revenues increased in the first nine months of fiscal 2020 by 2.1% to \$58.5 million from \$57.3 million for the first nine months of fiscal 2019. The percentage of our revenues derived from our diagnostic facilities management segment relative to the percentage of our revenues derived from our medical equipment segment increased slightly to 90.1% for the first nine months of fiscal 2020, from 88.5% for the first nine months of fiscal 2019.

The increase in HMCA revenues is principally due to HMCA's success in marketing the scanning services of the facilities managed or owned by HMCA, notwithstanding the decrease in reimbursement rates paid for MRI scans by insurers, Medicare and other government programs and the lockdowns imposed as a result of the COVID-19 virus. The reductions in reimbursement rates are not unique to HMCA or HMCA's clients but are being experienced by the industry in general.

HMCA's strategy is to counter the effects of lower reimbursement rates by increasing the scan volume of the facilities it owns or manages by adding additional scanners at current centers and increasing our marketing efforts. As a result of the COVID-19 virus, however, the Company has seen its scan volume decrease by approximately 50%. Nevertheless, the Company is continuing its program of adding additional scanners, even though the COVID-19 virus may delay the completion of the installation of some of the scanners. If scan volumes decrease further, or remain at lower volumes, the Company, notwithstanding its ample cash reserves, may need to reduce the size of its operations as a last resort.

Although the COVID-19 virus has adversely affected our marketing efforts our scan volumes in the third quarter of fiscal 2020, the number of scans performed at our centers and at our client's centers increased from approximately 136,000 in the first nine months of fiscal 2019 to approximately 139,000 in the first nine months of fiscal 2020. Our scan volume began to decline in late March 2020 as a result of the impact of the pandemic on referral sources, stay-at-home orders and travel restrictions. The scan volumes for the fourth quarter of fiscal 2020 can be expected to be adversely affected, if the lockdowns are not lifted or relaxed for a prolonged period.

We manage twenty-five sites, twenty-three of which are equipped with Fonar Upright® MRI scanners (our Upright® MRI Scanners are also called Stand-Up® MRI Scanners). HMCA experienced an operating income of \$16.4 million for the first nine months of fiscal 2020 compared to operating income of \$18.8 million for the first nine months of fiscal 2019, the decrease being due to greater increase in costs and expenses.

HMCA's cost of revenues for the first nine months of fiscal 2020 as compared to the first nine months of fiscal 2019 increased by 5.8% from \$29.9 million to \$31.6 million primarily as a result of the higher volume of scans performed and an increase in selling, general and administrative expense which outpaced revenue growth.

#### Consolidated

For the first nine months of fiscal 2020, our consolidated net revenues increased by 0.3% to \$64.9 million from \$64.7 million for the first nine months of fiscal 2019, and total costs and expenses increased by 11.1% to \$51.8 million from \$46.6 million for the first nine months of fiscal 2020 and for the first nine months of fiscal 2019 respectively. As a result, our operating income decreased to \$13.1 million in the first nine months of fiscal 2020 as compared to \$18.1 million in the first nine months of fiscal 2019. An increased selling, general and other administrative costs in particular resulted in the growth of cost and expenses.

Selling, general and administrative expenses increased to \$15.7 million in the first nine months of fiscal 2020 from \$12.5 million in the first nine months of fiscal 2019. The greater part of the increase was due to a \$2.6 million increase in the third quarter of fiscal 2020 (\$7.2 million in the third quarter of fiscal 2020 as compared to \$4.6 million in the third quarter of 2019). This increase in selling, general and administrative expenses was due mainly to additional reserves taken on Management Fees, service contract receivables, and on Notes receivable. Some of these reserves have been taken in the ordinary course of business and some in connection with the impact of the COVID-19 virus. The compensatory element of stock issuances, which is included in selling, general and administrative expenses, remained constant at \$0 for the first nine months of fiscal 2020 and 2019.

Research and development expenses increased by 16.2% to \$1.6 million for the first nine months of fiscal 2020 from \$1.4 million for the first nine months of fiscal 2019.

Interest expense in the first nine months of fiscal 2020 decreased by 26.9% to \$57,000 from \$78,000 in the first nine months of fiscal 2019. The decrease was due to the repayment of debt.

Inventories remained constant at \$1.8 million at March 31, 2020 and at June 30, 2019.

Net management fee and medical receivables increased by 7.5% to \$51.5 million at March 31, 2020 from \$47.9 million at June 30, 2019 as a result of slower collections. The slower collections were primarily due to an increase in no-fault and workers' compensation revenue, which typically takes longer to collect.

The results of operations for the first nine months of fiscal 2020 reflect an increase in revenues from management, patient and other fees, as compared to the first nine months of fiscal 2019 (\$58.5 million for the first nine months of fiscal 2020 as compared to \$57.3 million for the first nine months of fiscal 2019), and an decrease in MRI equipment segment revenues (\$6.4 million as compared to \$7.4 million). Revenues were 9.9% from the MRI equipment segment as compared to 90.1% from HMCA, for the first nine months of fiscal 2020, as compared to 11.5% from the MRI equipment segment and 88.5% from HMCA for the first nine months of fiscal 2019.

On March 27, 2020, the CARES Act was signed into law and is intended to provide over \$2 trillion in stimulus benefits for the U.S. economy. The CARES Act provides for certain federal income tax changes, including an increase in the interest expense tax deduction limitation, the deferral of the employer portion of Social Security payroll taxes, refundable payroll tax credits, net operating loss carryback periods, alternative minimum tax credit refunds and bonus depreciation of qualified improvement property. The federal income tax changes brought about by the CARES Act are complex and further guidance is expected. We are still reviewing and determining the extent to which the tax provisions of the CARES Act will effect the Company. We will expect a cash benefit from the ability to receive a full reimbursement of \$1,200 of tax credits relating to the alternative minimum tax credits in the current year plus additional cash benefits from the deferral of the employer portion of Social Security payroll taxes.

The implementation of the Patient Protection and Affordable Care Act (PPACA) has had a profound impact on the healthcare industry. We are experiencing some of the impact of the Act on our business in the reduction of reimbursement rates and fewer sales of our MRI equipment. Efforts to repeal and replace, or modify the PPACA may result in further significant changes in the healthcare industry and our business.

We are committed to improving our operating results and dealing with the challenges posed by legislative and regulatory requirements. Nevertheless, factors beyond our control, such as the COVID-19 virus, the timing and rate of market growth, economic conditions, the availability of credit and payor reimbursement rates, or unexpected expenditures and the timing of such expenditures, make it difficult to forecast future operating results.

As mentioned, one of the effects of the PPACA on our business has been the reduction in Medicare reimbursement rates for MRI scans. This also has resulted in a reduction in the reimbursement rates by commercial insurers and government programs which tie their reimbursement rates to the Medicare rates. Nevertheless, the increased patient volume of the scanning centers we manage or own has enabled us to maintain healthy operating results in spite of these challenges. We believe we are pursuing the correct policies to cope with these problems and the problems caused by the pandemic, and to improve the Company's operating results. However, our future revenues and results of operations may be adversely impacted by future reductions in reimbursement rates.

Our Upright® MRI (also referred to as the Stand-Up® MRI), together with our works-in-progress, are intended to significantly improve our competitive position.

The Upright® MRI scanner, which operates at 6000 gauss (.6 Tesla) field strength, allows patients to be scanned while standing, sitting, reclining and in multiple flexion and extension positions. It is common in visualizing the spine that abnormalities are visualized in some positions and not others. This enables surgical corrections that heretofore would not have been addressable for lack of visualizing the symptom causing the pathology and therefore, in general enables the treating physician to achieve a better treatment outcome for his patient. A floor-recessed elevator brings the patient to the height appropriate for the targeted image region. A custom-built multi-position adjustable bed will allow patients to sit or lie on their backs, sides or stomachs at any angle. This allows the MRI technologist to ask the patient to position himself/herself in the exact position that generates his/her pain so that images of the patient in the position that explicitly generates the patient's pain can be nailed down. Full-range-of-motion studies of the joints in virtually any direction are possible, a particularly promising feature for sports injuries.

In addition FONAR has announced the publication of a book "THE CRANIOCERVICAL SYNDROME and MRI" that highlights the unique attributes of FONAR UPRIGHT® MRI Imaging (S. Karger, A.G. based in Basel, Switzerland- www.karger.com/Book/Home/261956) which has been published by S. Karger, an approximately 125 year old company and an academic publisher of scientific and medical journals and books. The seven chapter monograph examines the rapid advances in MRI made possible by the FONAR UPRIGHT® Multi-Position MRI that are transforming the treatment of patients suffering from the craniocervical syndrome (CCS). It is written by leading international experts in the field to practitioners with a better understanding of the subtle anatomy and MRI appearances at the craniocervical junction, along with insight into the clinical significance of cerebrospinal fluid (CSF) flow measurements and its potential role in generating the devastating impairments of the neurodegenerative diseases: Alzheimer's (5.1 million patients in the United States), childhood and adult Autism (3.0 million), Parkinson's (1.0 million), Multiple Sclerosis (250,000-350,000) and Amyotrophic Lateral Sclerosis (ALS) (30,000). It calls attention to the revolutionary importance of FONAR's UPRIGHT® MRI imaging technology and the prospect of significantly relieving the suffering of the above totaled 9.38 million patients afflicted with these disorders.

Fonar also announced a major diagnostic breakthrough in multiple sclerosis achieved with advanced Upright® MRI. Medical researchers at FONAR published a paper reporting a diagnostic breakthrough in multiple sclerosis (MS), based on observations made possible by the Company's unique Upright® Multi-Position™ MRI scanner. The findings reveal that the cause of multiple sclerosis may be biomechanical and related to earlier trauma to the neck, which can result in obstruction of the flow of cerebrospinal fluid (CSF), which is produced and stored in the central anatomic structures of the brain known as the ventricles. Since the ventricles produce a large net volume of CSF each day (500 cc), the obstruction can result in a build up of pressure within the ventricles, resulting in leakage of the CSF and the antigenic polypeptides it contains into the surrounding brain tissue. This leakage could be responsible for generating the brain lesions of multiple sclerosis.

The paper, titled "The Possible Role of Cranio-Cervical Trauma and Abnormal CSF Hydrodynamics in the Genesis of Multiple Sclerosis," appears in the journal Physiological Chemistry and Physics and Medical NMR (Sept. 20, 2011).

This capability of the Fonar Upright® technology has demonstrated its key value on patients with the Arnold-Chiari syndrome [Cerebellar Tonsil Extopia (CTE)], which is believed to affect 200,000 to 500,000 Americans. In this syndrome, brain stem compression and subsequent severe neurological symptoms occur in these patients, because the brain stem descends and is compressed at the base of the skull in the foramen magnum, which is the circular bony opening at the base of the skull where the spinal cord exits the skull. Conventional lie-down MRI scanners cannot make an adequate evaluation of this pathology since the patient's pathology is most visible and the symptoms most acute when the patient is scanned in the upright fully weight-bearing position.

A combined study of 1,200 neck pain patients published in "Brain Injury" (July 2010) by eight university medical centers reported that cerebellar tonsil ectopia (CTE) of 1mm or greater was found and visualized 2.5 times (250%) more frequently when patients who had sustained automobile whiplash injuries were scanned upright rather than lying down.

The Upright® MRI has also demonstrated its value for patients suffering from scoliosis. Scoliosis patients have been typically subjected to routine x-ray exams for years and must be imaged upright for an adequate evaluation of their scoliosis. Because the patient must be standing for a complete evaluation of the extent of the patient's scoliosis, an x-ray machine has been the only modality that could provide that service. The Upright® MRI is the only MRI scanner which allows the patient to stand during the MRI exam. Fonar has developed an RF receiver and scanning protocol that for the first time allows scoliosis patients to obtain diagnostic pictures of their spines without the risks of x-rays. A study by the National Cancer Institute (2000) of 5,466 women with scoliosis reported a 70% increase in breast cancer resulting from 24.7 chest x-rays these patients received on the average in the course of their scoliosis treatment. The Upright® MRI examination of scoliosis enables the needed imaging evaluation of the degree of spine scoliosis without exposing the patient to the risk of breast cancer from x-radiation. Currently scoliosis affects more than 3,000,000 American women.

In addition, the University of California, Los Angeles (UCLA) reported their results of their study of 1,302 patients utilizing the Fonar Upright® MRI at the 22nd Annual Meeting of the North American Spine Society on October 23, 2007. The UCLA study showed the superior ability of the Fonar Upright® MRI to detect spine pathology, including spondylolisthesis, disc herniations and disc degeneration, as compared to visualizations of the spine produced by traditional single position static MRIs.

The UCLA study by MRI of 1,302 back pain patients when they were in the Fonar Upright® MRI and examined in a full range of flexion and extension positions made possible by Fonar's new Upright® technology established that significant "misses" of pathology were occurring with static single position MRI imaging. At L4-5, the vertebral level responsible for 49.8% of lumbar disc herniations, 35.1% of the spondylolistheses (vertebral instabilities) visualized by the Upright® MRI, were being missed by static single position MRI (510 patients). Since this vertebral segment is responsible for the majority of all disc herniations, the finding may reveal a significant cause of failed back surgeries. The UCLA study further showed the "miss-rate" of vertebral instabilities by static only MRI was even higher, 38.7%, at the L3-4 vertebral segment. Additionally, the UCLA study showed that MRI examinations of the cervical spine that did not perform extension images of the neck "missed" disc bulges 23.75% of the time (163 patients).

The UCLA study further reported that they were able to quantitatively measure the dimensions of the central spinal canal with the "highest accuracy" using the FONAR Upright® MRI thereby enabling the extent of spinal canal stenosis that existed in patients to be measured. Spinal canal stenosis gives rise to the symptom complex intermittent neurogenic claudication manifest as debilitating pain in the back and lower extremities, weakness and difficulties in ambulation and leg paresthesias. Spinal canal stenosis is a spinal compression syndrome separate and distinct from the more common nerve compression syndrome of the spinal nerves as they exit the vertebral column through the bony neural foramen.

The Fonar Upright® MRI can also be useful for MRI directed emergency neuro-surgical procedures as the surgeon would have unhindered access to the patient's head when the patient is supine with no restrictions in the vertical direction. This easy-entry, mid-field-strength scanner could prove ideal for trauma centers where a quick MRI-screening within the first critical hour of treatment will greatly improve patients' chances for survival and optimize the extent of recovery.

MRI has brought a new dimension to MEDICAL TREATMENT, the power to VISUALIZE ANATOMIC DETAIL in the body's VITAL SOFT TISSUES (brain, heart, kidney, liver, spleen, lungs, pancreas, intestines) plus MRI's new power to non-invasively QUANTIFY (e.g. measure T1, T2, diffusion, chemical spectra) the response of these VITAL TISSUES to treatment.

#### Liquidity and Capital Resources

Cash and cash equivalents, and short term investments increased by 7.2% from \$29.0million at June 30, 2019 to \$31.0 million at March 31, 2020.

Cash provided by operating activities for the first nine months of fiscal 2020 was \$13.9 million. Cash provided by operating activities was attributable principally to net income of \$10.6 million, depreciation and amortization of \$3.0 million and deferred income tax of \$2.5 million, offset by an increase in accounts, management fee receivables and medical receivables of \$6.8 million and a decrease in operating lease liabilities of \$2.2 million.

Cash provided by investing activities for the first nine months of fiscal 2020 was \$8.4 million. Cash provided by investing activities was attributable to short term investment of \$15.1 million offset by uses of cash used in investing activities during the first nine months of fiscal 2020 of patent costs of \$79,000 and the purchase of property and equipment of \$6.6 million.

Cash used in financing activities for the first nine months of fiscal 2020 was \$5.2 million. The principal uses of cash in financing activities during the first nine months of fiscal 2020 were the repayment of principal on long-term debt and capital lease obligations of \$33,000 and distributions to non-controlling interests of \$5.1 million.

Total liabilities increased by 195.1% to \$45.6 million at March 31, 2020 from \$15.4 million at June 30, 2019. This was primarily due to the adoption of the new accounting pronouncement regarding leases in the amount of \$31.9 million. "Other" current liabilities decreased by 31.9% to \$5.2 million at March 31, 2020 from \$7.6 million at June 30, 2019. Long-term debt and capital lease obligations decreased from \$273,000 to \$247,000. The current portion of our unearned revenue on service contracts increased from \$3.8 million to \$3.9 million. Customer deposits increased from \$799,000 at June 30, 2019 to \$854,000 at March 31, 2020 as a result of an increase in services performed.

As of March 31, 2020, the total of \$5.2 million in "other" current liabilities included accrued salaries and payroll taxes of \$1.4 million, and sales taxes of \$1.5 million plus accrued interest and penalties of \$1.0 million.

Our working capital increased to \$76.5 million at March 31, 2020 from \$71.0 million at June 30, 2019. This resulted from an increase in current assets (\$85.1 million at June 30, 2019 as compared to \$91.4 million at March 31, 2020), and a smaller increase in current liabilities from \$14.1 million at June 30, 2019 to \$14.9 million at March 31, 2020.

The ultimate realization of deferred tax assets is dependent on the generation of future taxable income during the periods in which those temporary differences become deductible or when such net operating losses can be utilized. The Company considers projected future taxable income, the regulatory environment of the industry, and tax planning strategies in making this assessment. At the present, the Company believes that it is more likely than not that the benefits from certain deferred tax asset carryforwards, will not all be fully realized. In recognition of this inherent risk, a valuation allowance was established for the partial value of the deferred tax asset, (principally related to research and development tax credits and allowance for doubtful accounts). A valuation allowance will be maintained until sufficient positive evidence exists to support the reversal of any portion or all of the valuation allowance.

The Company's effective income tax rate is based on expected income, statutory rates and tax planning opportunities available in the various jurisdictions in which it operates. For interim financial reporting, the Company estimates the annual income tax rate based on projected taxable income for the full year and records a quarterly income tax provision or benefit in accordance with the anticipated annual rate. The Company refines the estimates of the year's taxable income on a periodic basis as new information becomes available, including actual year-to-date financial results. This continual estimation process often results in a change to the expected effective income tax rate for the year. When this occurs, the Company adjusts the income tax provision during the quarter in which the change in estimate occurs so that the year-to-date provision reflects the expected income tax rate. Significant judgment is required in determining the effective tax rate and in evaluating tax positions.

The Tax Cuts and Jobs Act was signed into law on December 22, 2017 and made numerous changes to the Internal Revenue Code. Among other changes, the Act reduced the US corporate income tax rate to 21% effective January 1, 2018.

Under ASC Topic 740, Accounting for Income Taxes, the enactment of the Tax Act also required companies, to recognize the effects of changes in tax laws and rates on deferred tax assets and liabilities and the retroactive effects of changes in tax laws in the period in which the new legislation in enacted. The Company's gross deferred tax assets and liabilities were revalued form 35% to 21%. Deferred tax assets of approximately \$46.2 million (as of the enactment effective date) were revalued to approximately \$30.2 million with a corresponding decrease to the Company's valuation allowance.

In May 2014, the FASB issued ASU No. 2014-09, Revenue from Contracts with Customers, (Topic 606). ASU 2014-09 requires an entity to recognize as revenue the amount that reflects the consideration which it expects to be entitled in exchange for goods and services as it transfers control to its customers. It also requires more detailed disclosures to enable users of the financial statements to understand the nature, amount, timing and uncertainty of revenue and cash flows arising from contracts with customers. The Company earns revenue from the sale of scanners, maintenance contracts, product upgrades, patient services and management fees. Under the new guidance, the reporting for patient services revenue is now reported differently. All other streams of revenue were not impacted by the new guidance. The primary change for healthcare providers under the new guidance relates to revenue generated from patient services, with patient responsibility for payment. Under the new guidance, the Company is required to report an implicit price concession (both initially and for the subsequent changes in estimates) as a reduction of revenues as opposed to bad debt expense as a component of operating expenses. The Company now records any changes in expectation of collection amounts due to patient specific events that suggests that the patient no longer has the ability and intent to pay the amount due through the bad debt expense, as that is more indicative of a change in the customer's credit worthiness as opposed to change in the transaction price.

The new standard supersedes most current revenue guidance, including industry-specific guidance. The guidance became effective for the Company on July 1, 2018 and as part of adopting the standard, the Company identified revenue streams of like contracts to allow for ease of implementation. The Company used primarily a portfolio approach to apply the new model to classes of customers with similar characteristics. The impact of adopting the new standard on our total revenue; and income from operations was not material. While the adoption of ASU 2014-09 did impact the presentation of net operating revenues in our Consolidated Statements of Operations and impacts certain disclosures, it did not materially impact our financial position, results of operations or cash flows. There was no cumulative effect of a change in accounting principle recorded related to the adoption of ASU 2014-09 on July 1, 2018.

On March 27, 2020 Congress enacted the CARES Act (Coronavirus Aid, Relief and Economic Security Act). The Act provides numerous tax provisions and other stimulus measures, including temporary changes regarding prior and future operating losses, temporary changes to the prior and future limitations on interest deductions, temporary suspension of certain payment requirements for the employer portion of Social Security taxes, technical corrections to prior tax legislation for tax depreciation of certain qualified improvement property and the creation of refundable employee retention credits. At the present time, the only impact of the CARES Act to the Company is allowing a full reimbursement of \$1,200 of tax credits relating to the alternative minimum tax credits in the current year. Previously, these credits were to be refunded over a period of 3 years. We will also realize a cash benefit from the deferral of Social Security payroll taxes.

On April 20, 2020, we entered into a \$5.0 million loan agreement under the Paycheck Protection Program (PPP) under the CARES Act. Due to an abundance of caution, on May 1 2020, we returned the full amount of the loan, since it became increasingly unclear whether or not public companies would be required to seek other sources of liquidity.

Fonar has not committed to making any significant capital expenditures for the remainder of the 2020 fiscal year with the exception of placing additional scanners at facilities located in Islandia and White Plains, New York. Also, we signed a lease and have begun the construction for a new location for a new facility in Pembroke Pines, Florida which we anticipate to be completed in the first quarter of 2021.

Critical to our business plan are the improvement and expansion of the MRI facilities managed or owned by HMCA, and increasing the number of scans performed at those facilities. In addition, our business plan calls for a continuing commitment to providing our customers with enhanced equipment service and maintenance capabilities and delivering state-of-the-art, innovative and high quality equipment and upgrades at competitive prices.

Management is seeking to promote wider market recognition of Fonar's scanner products, and to increase demand for Upright® scanning at the facilities HMCA owns or manages. Given the liquidity and credit constraints in the markets, the uncertainty resulting from the Patient Protection and Affordable Care Act or its repeal and replacement, and the impact of the COVID-19 virus on the economy in general, the sale of medical equipment has and may continue to suffer.

The Company believes that its business plan has been responsible for the past seven consecutive fiscal years and first two fiscal quarters of fiscal 2020 of profitability and that its capital resources will be adequate to support operations through at least March 31, 2021. The future effects on our business of healthcare legislation, the Deficit Reduction Act, the 2.3% excise tax on sales of medical equipment, reimbursement rates, public health conditions and the general economic and business climate are not known at the present time. Nevertheless, there is a possibility of adverse consequences to our business operations from these causes. Although the Company can not predict the full effect of COVID-19 for the fourth fiscal quarter or later period, the Company that it has revenues, cash reserves and other assets that will enable it to continue to operate until at least March 31, 2021.

#### Item 3. Quantitative and Qualitative Disclosures About Market Risk

The Company maintains its funds in liquid accounts. None of our investments are in fixed rate instruments.

All of our revenue, expense and capital purchasing activities are transacted in United States dollars.

#### Item 4. Controls and Procedures.

#### Disclosure Controls and Procedures

We carried out an evaluation as of the end of the period covered by this Quarterly Report on Form 10-Q, under the supervision and with the participation of our management, including our chief executive officer and chief financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the Exchange Act is accumulated and communicated to the issuer's management, including its principal executive and principal financial officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. Based upon our evaluation, our chief executive officer and chief financial officer has concluded that the Company's internal control over financial reporting was effective as of the March 31 ,2020, in ensuring that material information that we are required to disclose in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the same time periods specified in the Securities and Exchange Commission rules and forms. Form

As previously identified and disclosed in the Company's Annual Report on Form 10K for the year ended June 30, 2019, the most recent fiscal year, management had determined that adequate controls did not exist over the classification of certain financial instruments as cash equivalents or short term investments. As of the end of the period covered by this Quarterly Report on Form 10-Q, the Company has designed and implemented controls to properly classify cash and cash equivalents and short term investments. The Company has determined that the following material weakness in our internal control over financial reporting previously reported as of June 30, 2019 we remediated as of March 31, 2020

To remediate the material weakness described above, we have designed and implemented compensating controls and are enhanced and revised the design of existing controls and procedures to ensure the proper classification of financial instruments as cash equivalents or as short-term or long-term investments, basis We are no longer required to have our auditors audit our internal controls but we continue to engage an independent consultant to assist us in reviewing and maintaining our internal controls.

Changes in Internal Control over Financial Reporting

Other than to the extent for the extent described above, there were no changes in our system of internal control over financial reporting during our most recently completed fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

#### PART II - OTHER INFORMATION

Item 1 – Legal Proceedings: There were no material changes in litigation from that reported in our Form 10-K for the fiscal year ended June 30, 2019 or the fiscal quarters ended September 30, 2019, December 31, 2019 and March 31, 2020

Item 1A – Risk Factors: An investment in the securities of the Company is subject to various risks, the most significant of which are summarized below.

- 1. Reduced Reimbursement Rates. Most of our revenues are derived from our scanning center business conducted by HMCA. Our scanning center clients and the Florida facilities owned by HMCA are experiencing lower reimbursement rates from Medicare, other government programs and private insurance companies. To date, the impact of these reductions has been countered by increasing scanning volume and reducing our operating expenses, thereby maintaining profitability in this business segment. There is, however, no assurance that we will be able to continue to do so.
- 2. Demand for MRI Scanners. The reduced reimbursement rates also affects our sales of MRI scanners negatively. With lower revenue projections, fewer prospective customers will be able to operate, and others are likely to demand lower prices for scanners. Although the reduced reimbursements may not affect foreign demand, a lower number of sales in the aggregate could reduce economies of scale and consequently, profit margins. The demand for MRI scanners could be further reduced by any downturn in the economy resulting from the COVID-19 virus and the lockdowns resulting from the COVID-19 virus.
- 3. Manufacturing Competition. Many if not most of our competing scanner manufacturers have significantly greater financial resources, production capacity, and other resources than we do. Such competitors would include General Electric, Siemens, Hitachi and Phillips. Although Fonar is the only company which can manufacture and sell the unique Stand-Up® (Upright®) MRI scanner, potential customers must be convinced that the purchase of a Fonar scanner is their best choice. We believe that with time, that objective will be reached, particularly with customers scanning patients having neck, back, knee and various orthopedic issues who would benefit from being scanned in weight-bearing positions.
- 4. Dependence on Referrals. HMCA derives substantially all of its revenue, directly or indirectly, from fees charged for the diagnostic imaging services performed at the facilities. We depend on referrals of patients from unaffiliated physicians and other third parties to the facilities we manage or own for the MRI scanning services performed. If these physicians and other third parties were to reduce the number of patients they refer or discontinue referring patients, scan volumes could decrease, which would have the effect of reducing our net revenue, from both management and scanning fees, and operating margins.

- 5. Pressure to Control Healthcare Costs. One of the principal objectives of health maintenance organizations and preferred provider organizations is to control the cost of healthcare services. Healthcare providers participating in managed care plans may be required to refer diagnostic imaging tests to certain providers depending on the plan in which a covered patient is enrolled. In addition, managed care contracting has become very competitive. The expansion of health maintenance organizations, preferred provider organizations and other managed care organizations within New York or Florida could have a negative impact on the utilization and pricing of services performed at the facilities HMCA manages or owns to the extent these organizations exert control over patients' access to diagnostic imaging services, selections of the provider of such services and reimbursement rates for those services.
- 6. Scanning Facility Competition. The market for diagnostic imaging services is highly competitive. The facilities we manage or own compete for patients on the basis of reputation, location and the quality of diagnostic imaging services. Groups of radiologists, established hospitals, clinics and other independent organizations that own and operate imaging equipment are the principal competitors.
- 7. Eligibility Changes to Insurance Programs. Due to potential decreased availability of healthcare through private employers, the number of patients who are uninsured or participate in governmental programs may increase. Healthcare reform legislation will increase the participation of individuals in the Medicaid program in states that elect to participate in the expanded Medicaid coverage, subject to any changes which may result from efforts to repeal and replace the PPACA. A shift in payor mix from managed care and other private payors to government payors or an increase in the number of uninsured patients may result in a reduction in the rates of reimbursement or an increase in uncollectible receivables or uncompensated care, with a corresponding decrease in net revenue. Policies now being offered under various insurance plans are expected to reduce demand for MRI scans as they become less affordable. Changes in the eligibility requirements for governmental programs such as the Medicaid program and state decisions on whether to participate in the expansion of such programs also could increase the number of patients who participate in such programs and the number of uninsured patients. Even for those patients who remain in private insurance plans, changes to those plans could increase patient financial responsibility, resulting in a greater risk of uncollectible receivables. These factors and events could have a material adverse effect on our business, financial condition, and results of operations.
- 8. Proposed Changes to New York Workers' Compensation Benefits. A proposal was published by the New York State Workers' Compensation Board ("NYSWCB") in 2014 to change the fee schedule for Workers' Compensation payments. Initially, the fees proposed would be set at approximately 130% of the Medicare fees. This would reduce fees for the most commonly billed radiology procedures by approximately 60%. Further, since the Workers' Compensation fees are coupled with the New York State No Fault Program, radiology providers would suffer similar reductions for No-Fault fees. We and the HMCA clients wrote to the NYSWCB to argue against this proposal, and other affected parties commented as well. Since then, no further action has been taken by the NYSWCB to advance the 2014 proposal. On the contrary, the NYSWCB has adopted fee increases. There can be no assurance, however, that the NYSWCB will not modify their present position, or if they elect to do so, the extent to which the NYSWCB would do so. A significant reduction in Workers' Compensation and No-Fault fees could have a material adverse impact on our business.

- 9. Possible changes in Florida Insurance Law. In early 2019, two senate bills and one house bill in Florida were introduced, all of them calling for the repeal of PIP and replacing PI with \$25,000 Bodily Injury Coverage and Property Damage Liability Coverage. Another Florida senate bill was introduced that would preserve PIP but dramatically cut reimbursement rates. None of the proposed bills ever made it onto the 2019 legislative agenda, but similar efforts in the future might be successful. Currently, drivers and passengers get car damages and PIP paid for up to \$10,000, no matter who is at fault in an accident. Drivers have to pay an additional cost to insurance companies to pay for bodily injuries, which covers them if they are at fault. While PIP is required, coverage for bodily injury is not. The insurance industry is pushing to scrap PIP and instead mandate all motorists to carry coverage that includes a minimum of \$25,000 bodily injury if they are at fault. Eliminating PIP would mean that the \$10,000 drivers now get paid toward medical costs through their insurers might not be there for them to pay for injured drivers. Importantly, payments would be reduced by approximately 60% due to claims being paid at commercial rates or through legal settlements instead of at the presently prevailing PIP fee schedule. This would negatively impact our seven diagnostic imaging facilities (both those we own and those we manage) with more unpaid bills, lower reimbursement rates and elongated waiting times.
- 10. Federal and state privacy and information security laws. We must comply with numerous federal and state laws and regulations governing the collection, dissemination, access, use, security and privacy of PHI, including HIPAA and its implementing privacy and security regulations, as amended by the federal HITECH Act and collectively referred to as HIPAA. If we fail to comply with applicable privacy and security laws, regulations and standards, properly maintain the integrity of our data, protect our proprietary rights to our systems, or defend against cybersecurity attacks, our business, reputation, results of operations, financial position and cash flows could be materially and adversely affected.

Information security risks have significantly increased in recent years in part because of the proliferation of new technologies, the use of the internet and telecommunications technologies to conduct our operations, and the increased sophistication and activities of organized crime, hackers, terrorists and other external parties, including foreign state agents. Our operations rely on the secure processing, transmission and storage of confidential, proprietary and other information in our computer systems and networks.

11. Changes in Domestic and Worldwide Public Health and Economic Conditions; COVID-19 Virus. We are subject to risk arising from adverse changes in general domestic and global economic and other conditions, including pandemics, recessions or economic slowdowns and disruptions of credit markets. Turbulence and uncertainty in the United States and international markets and economies may adversely affect our workforce, liquidity, financial condition, revenues, profitability and business operations generally. In addition, a pandemic, such as the COVID-19 virus which most of the World is now experiencing, can erupt suddenly and have a materially adverse effect on worldwide health and economic conditions. The COVID-19 virus has caused us to require that much of our workforce work from home and restricted the ability of our personnel to travel for marketing purposes or to service our customers. As a result of the lockdowns occasioned by the COVID-19 virus, the number of scans performed at the MRI scanning facilities owned or managed by us has declined by approximately 50%. Although we have substantial cash reserves, if the lockdowns occasioned by the COVID-19 virus cannot be lifted or substantially relaxed for a prolonged period of time, our ability to operate our business at pre-COVID-19 levels could be materially compromised At the present time we can offer no assurances as to the course the virus may take, whether conditions may improve in the short- term, over an extended period, or even worsen or resurface.

12. COVID-19 Virus; The global pandemic of COVID-19 is affecting our facilities, employees, patients, communities, business operations and financial performance, as well as the broader U.S. economy and financial markets. COVID-19 is still evolving and much of its impact remains unknown and difficult to predict; however, it has adversely affected our business operations, is expected to impact our financial performance for the fourth quarter of 2020. COIVID-19 is resulting in fewer referrals to our facilities and lower voluntary admissions as individuals may be less inclined to t leave their homes and seek treatment all of which have resulted in reduced patient volumes of approximately 50%. If employees and/or patients at a facility are infected with COVID-19, there is a risk that the virus could spread to others at the facility and impact the operations of such facility. It is difficult to predict the duration of lower patient volume, and once restrictions are eased, we cannot predict the timing or the likelihood of returning to pre-COVID volumes. Pandemic relating staffing difficulties and equipment, pharmaceutical and medical supply shortages may impact our ability to treat patients at our facilities. Such shortages could lead to us paying higher prices for supplies, equipment and labor.

Steps we are taking to mitigate the financial impact may have negative impacts on our financial conditions and results of operations, including:

- \* Postponing maintenance capital expenditures and growth capital expenditures, including facility expansions that could have long-term negative impacts on our ability to grow and our business plans and expectations
- \* Managing corporate and facility-level staffing costs by reducing hours, implementing employee furloughs and implementing a hiring freeze for non-clinical staff could negatively impact our ability to provide services once volumes return and could negatively impact employee morale and recruitment efforts.
- \* Reducing marketing expenditures could impact our ability to attract referring sources and patients to our facilities
- \* Reducing corporate expenses could impact our ability to support our facilities and future operations.

Broad economic factors resulting from COVID-19, including increasing unemployment rates and reduced consumer spending, could also negatively affect our payor mix, increase the relative proportion of lower margin services we provide and reduce patient volumes, as well as diminish our ability to collect outstanding receivables. Business closings and layoffs in the areas in which we operate may lead to increases in the uninsured and underinsured populations and adversely affect demand for our services, as well as the ability of patients and other payors to pay for services as rendered. Any increase in the amount or deterioration in the collectability of patient accounts receivable will adversely affect our cash flows and results of operations, requiring an increased level of working capital. If general economic conditions continue to deteriorate or remain uncertain for an extended period of time, our liquidity may be harmed. In addition, our results and financial condition may be further adversely affected by federal or state laws, regulations, orders or other government or regulatory actions addressing the current COVID-19 pandemic or healthcare systems, which, if adopted, could result in direct or indirect restrictions to our business, financial condition, results of operations and cash flows.

The foregoing and other continued disruptions to ur business as a result of the COVID-19 pandemic have had and are likely to continue to have an adverse effect on our business and could have material adverse effects on our results of operations, financial condition and cash flows.

Item 2 - Unregistered Sales of Equity Securities and Use of Proceeds: None

Item 3 - Defaults Upon Senior Securities: None

Item 4 - Mine Safety Disclosure: Not Applicable

Item 5 - Other Information: None

Item 6 - Exhibits and Reports on Form 8-K:

- a) Exhibit 31.1 Certification. See Exhibits
- b) Exhibit 32.1 Certification. See Exhibits
- c) Report on Form 8-K filed on February 10, 2020, Item 2.02: Results of Operations and Financial Condition for the fiscal quarter ended December 31, 2019.
